

## Eco garden and active play area project underway!

Thank you for your support with voting for us at the Tesco Bags of Help. We are also happy to announce that thanks to the London City Airport 30th Anniversary

Fund we have also been awarded £3000. This new injection of funding has allowed us to begin working on our School Ground Development Plan.

### School Ground Development

We will be working with Father Nature, [www.fathernature.org.uk](http://www.fathernature.org.uk), to design and build our new Eco garden here at Manor Junior School. Our project will be getting underway this

month. Students will be involved in both the designing and the building of the garden. We will be holding design competitions throughout January allowing students to use skills in Maths and Art. We will also be holding community days where we will be looking to the friends of Manor Junior School to come and lend a hand.

### Key dates for your calendar

As we begin the landscaping of the field and forest area, we would like to invite everyone to participate in every aspect of the project.

#### **Sustainability week: 8th—12th January**

We will be looking at ways to help save energy in school and at home.

#### **Parent Partnership Session: Tuesday 9th and 16th January 9:05 am**

We would like to invite you to attend a Parent Partnership Session with **Crispin** and **Mr Tunncliffe** to discuss what we have planned.

#### **Landscaping to commence: Thursday 25th January**

**Crispin** and the Father Nature team will begin working on the project.

#### **Community gardening day: Friday 9th February**

Parents and carers are invited to work along side the Father Nature team with their children from 1:15pm to help with the planting. We will be providing tools and guidance, all you need to bring is yourself and some clothes you don't mind getting dirty.

A massive thank you to John and his team at B & Q for their help and generosity with providing Manor Junior School with over 50 plants

for both our school grounds and classrooms. Two of our Eco school councils went down and met with John at B & Q in Beckton to choose some plants for our school. We have chose plants that increase oxygen levels and reduce pollution.

The B&Q logo, consisting of the letters 'B&Q' in white on an orange square background.

**Thanks again John!**

### Donations of materials

With our skilled team from Father Nature we are hoping to create an exciting green area that will benefit all children for years to come. To do this we would like your help with donating some materials that we can up-cycle and reuse. I hope you can help. If you or your business can help in any way with our project please email us.

## Thank You, C.B. Autos!

A massive thank you to C.B. Autos for their donations of old tyres which we will be turning into planters.
